Art Unit: 1793

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a carbon fiber.

Group II, claim(s) 6, drawn to a double layer.

Group III, claim(s) 7, drawn to an electrode.

Group IV, claim(s) 8, drawn to a fuel cell.

Group V, claim(s) 9-12, drawn to a method.

Group VI, claim(s) 13-17, drawn to a different method.

Group VII, claim(s) 18-21, drawn to making an electrode.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: See the reasons given in the previous requirement. Claims 9 and 13 use materially different reagents and conditions. The carbon of Group I can be used as a sorbent or filler.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The prior requirement is otherwise incorporated herein by reference.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (571) 272-1351.
